Introduction to the YouthWorks Database

Winter/Spring 2022-2023

Signing Up for a Username and Password

YouthWorks staff need a username and password to access the database. To sign up for a username, go to the sign-in screen at <u>https://youthworksdata.org</u> At the bottom of the page select the button "Register for a Username'.

Signing Up for a Username and Password

Fill in your information and SAVE. Check with a colleague if you are not sure of your YouthWorks program or region.

Anyone with "ADMIN" access to the database can approve your account and generate an email to you with your username and password. (Check with your manager if you don't see an email with this information within about 24 hours.)

Learning about the YouthWorks Database

The complete database manual with presentations and videos is available in the database. A PDF of the manual is also available via the ____ folder.

In the database, click the ABOUT link on the footer of any page or the "information" icon on the top navigation bar to open the manual. You can also find additional information by looking for the "information" icon at the bottom of many pages in the database.

2 CommCorp provides database Q&A sessions and database workshops. See the weekly updates email for training dates or email us to find out dates or to schedule a workshop session for your program.

Don't hesitate to explore the database on your own and don't hesitate to ask questions! Talk to your colleagues or email us with your questions. See the "About" page in the Database Manual for email addresses.

Visualizing the Database Structure

The next section of this presentation visually outlines the basic structure of the YouthWorks database, focusing on the screens for:

- Enrolling PARTICIPANTS;
- Listing WORKSITES and WORKSHOP/TRAINING OPPORTUNITIES;
- MATCHING

The other sections of the database flow from these three areas. You will find that many of the database features become available once a participant is coded as Placed-YouthWorks, placed in a YouthWorks tier, and matched.....

- Youth Landing Pages, with:

- Signal Success modules
- Calendar
- Opportunity to enroll in Micro Career Trainings
- Work-Based Learning Plans
- Attendance screens for workshop/training attendance
- Youth Completion screens
- Email composer features
- AND MORE

About the Database

The database is designed to support all aspects of the YouthWorks program, and there are a wide range of features!

Not every staff member needs to use every feature, and you will soon become familiar with the features that you are using.

There is a chart at the end of this presentation and in the manual that lists features used in each phase of the YouthWorks program cycle. Look over this chart, and review it in meetings with colleagues, to think about which features you will be using.

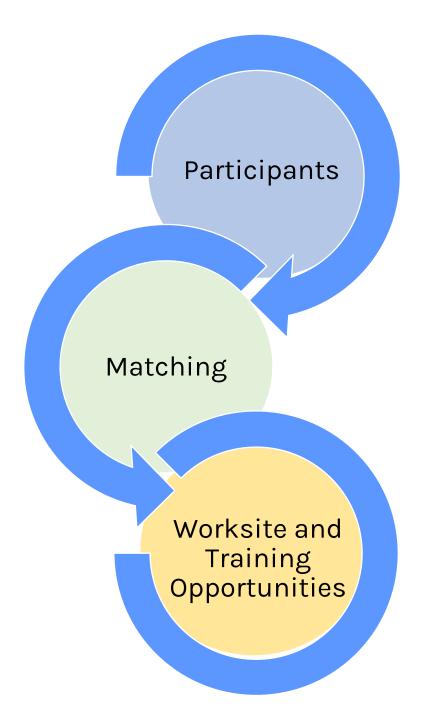

This presentation provides the main features of the database. There are additional presentations, videos and materials in the database guide that will help you learn more.

YouthWorks Database Structure: Participants, Opportunities & Matching

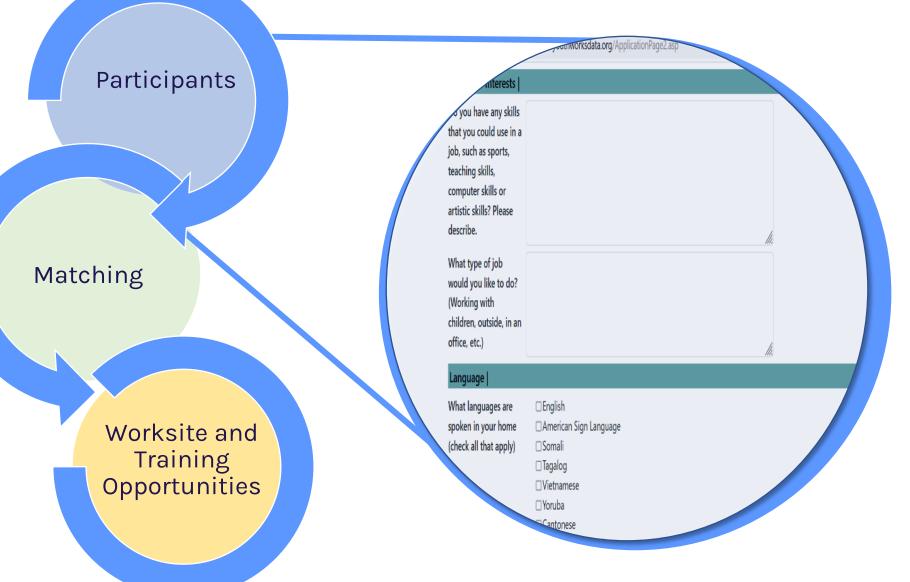

YouthWorks Database Organization

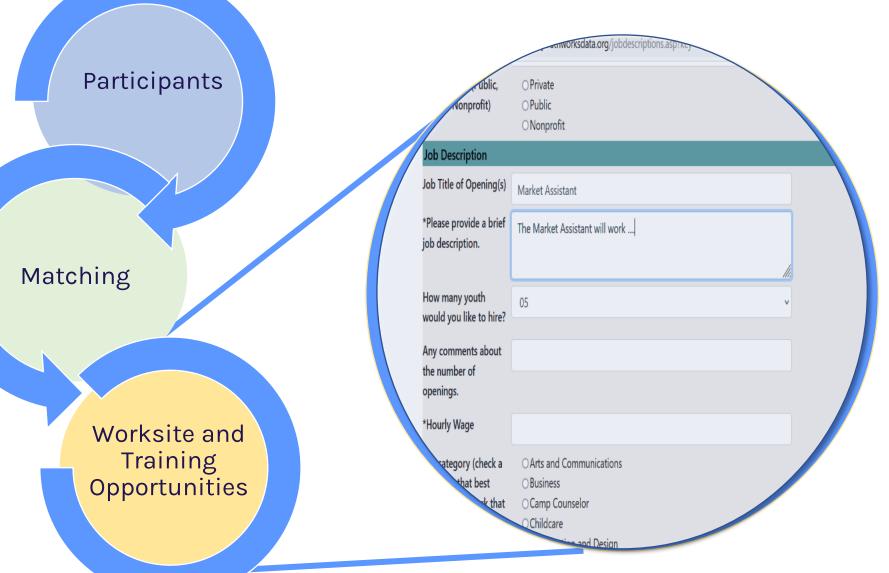

Youth participant information is gathered via the Online participant application form or youth profile screens.

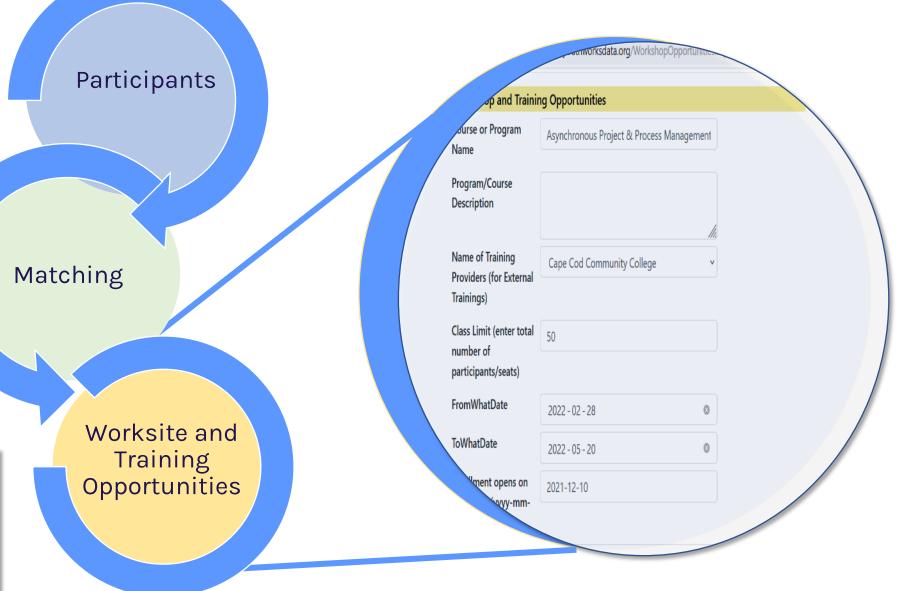

WORKSITES: Potential employers can fill in the online worksite application form or staff can fill in worksite information using Add/Edit Job Descriptions form.

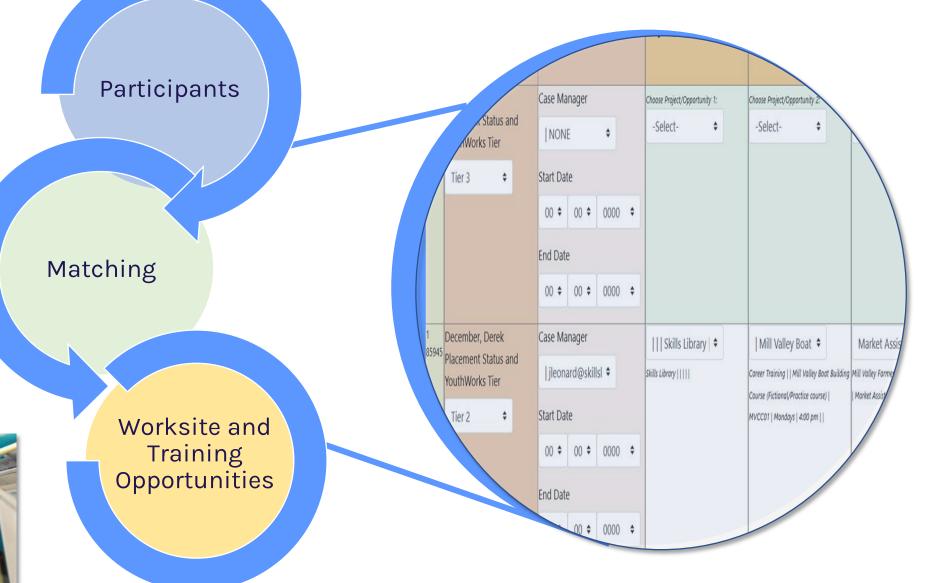

ALSO: Statewide and local/regional staff list workshops and career training opportunities, using the Add/Edit Workshop / Training Opportunities screen.

Once you have gathered this information.... the matching screens are used to MATCH participants with worksite and training opportunities.

There are three variations on the matching screen.

Worksite and Training Opportunities

Participants

Matching

THREE VERSIONS:

Basic matching screen
 Checklist matching screen
 Pre-matching screen

ALSO: Youth can match themselves with micro career training opportunities through a screen in the youth landing pages.

Matchi	ng

The basic matching screen lists the participants, grouped in batches of 1, 5, 10 or 20, with columns for (a.) indicating placement status and tier; (b.) identifying a case manager; (c.) Indicating expected participation dates; and (d.) matching the participant with one or more opportunities, including a worksite, any career training opportunities, and Signal Success workshops.

Grants Reporting About

A sample screen (Right) – this is the Youth Profile screen.

On this and other screens: [1.] Use the navigation features at the top of the screen to navigate to a participant record. [2.] To create a new record, always click the button to add a new, blank record (and NEVER **OVERWRITE** an existing record). [3.] Always click SAVE to save any updates you have made.

As you explore the database, you can try out these navigation features, which appear on many different pages.

To go to an existing record (such as a participant, a job description, etc.), use the box that says –GO TO ITEM- to choose the record, then click the button that says –Go-.

To filter the list and see a subset of records, use the –Quick Filterdropdown, or explore the more advanced "Filter/Sort" options.

To remove any filters, click Refresh/Clear.

And most important: remember to use the ADD button to add a new, blank record.

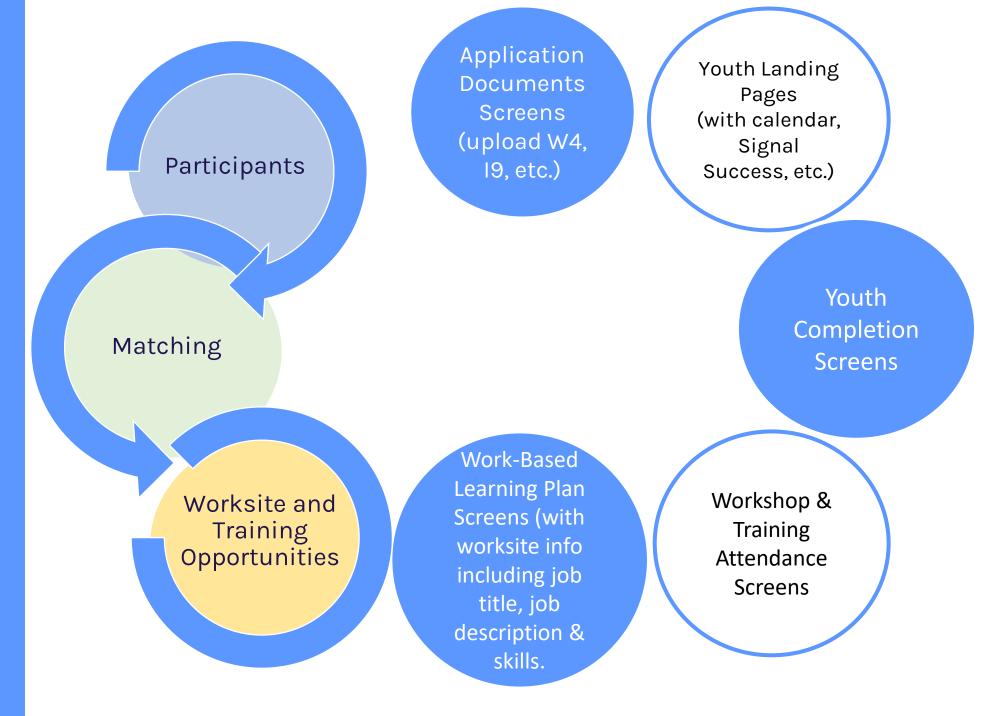

On every database screen, notice these settings in the top right corner.

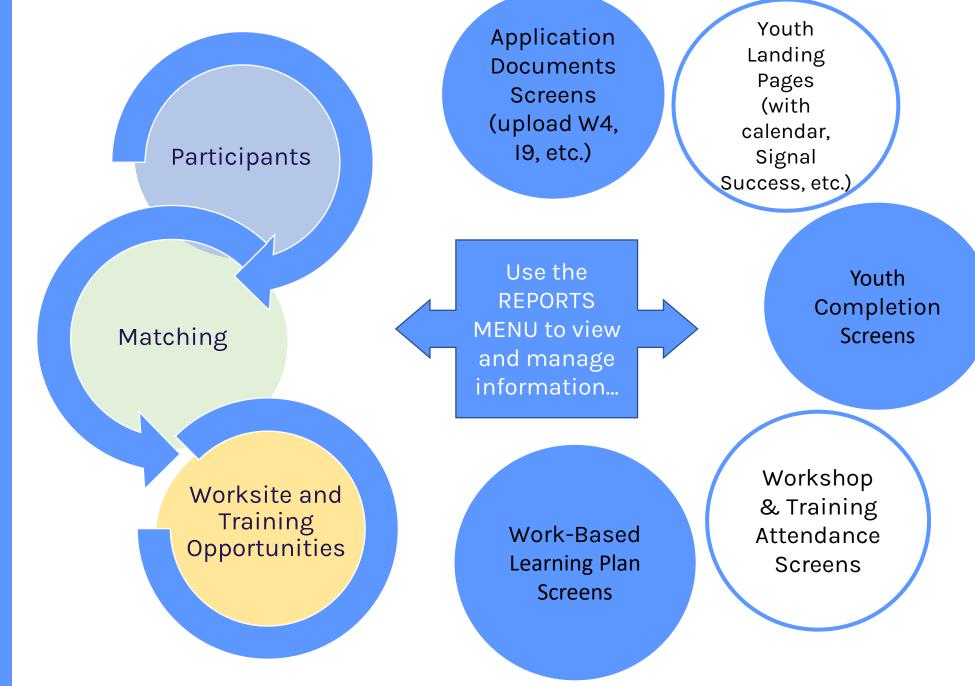

[1.] Choose the current YouthWorks program cycle from the dropdown list.

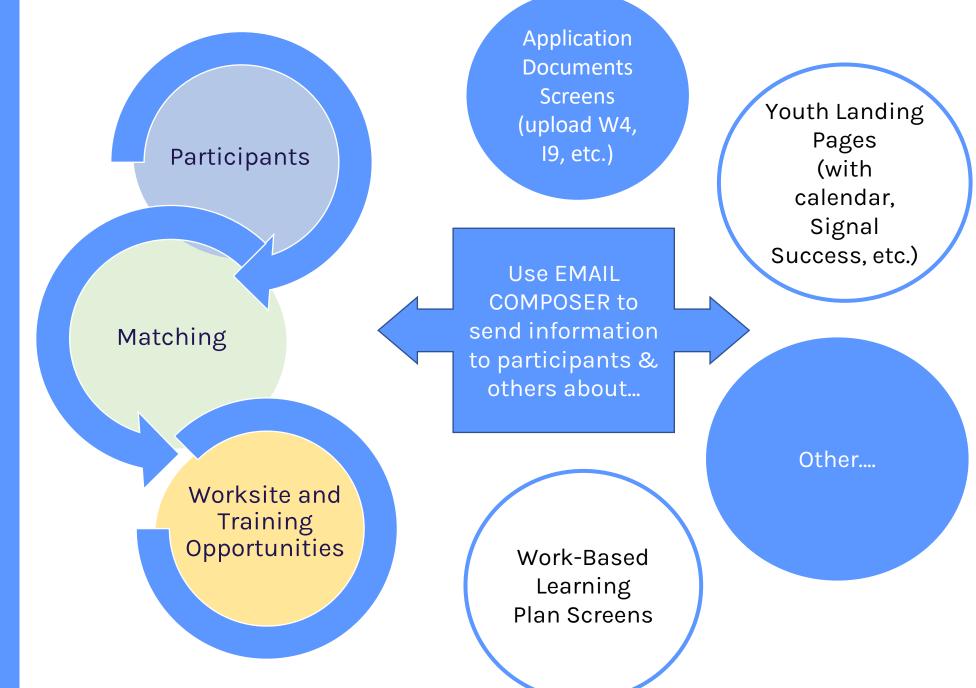

[2.] If you are a regional administrator, you may also have a dropdown list that allows you to select a YouthWorks program (referred to as the YW Program). Note that some regions have just one program regionwide while others have multiple programs within the region.

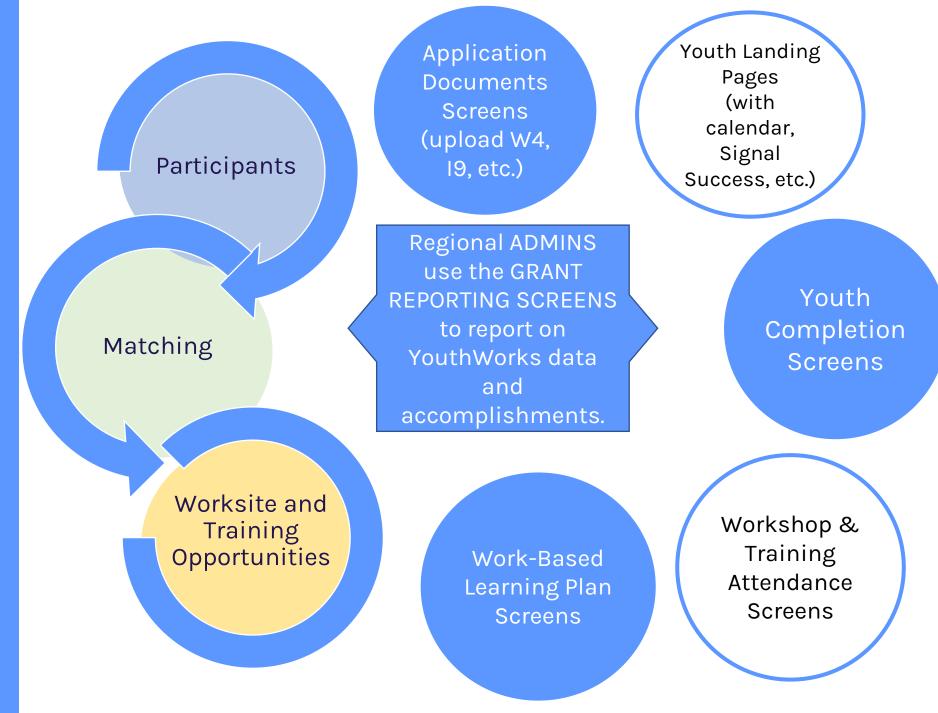

[3.] If you are browsing outside the current cycle or in the region-wide view, screens may be set to "read-only" so you can browse but not make changes. Typically, you will be working in the current cycle (or an upcoming or recently-completed cycle) and in your specific YW program setting.
